**\$10.00 off a Celestron
Cometron 60 Telescope!**

The Cometron 60 telescope from Celestron is an ideal first telescope. It can be used for both earth and sky viewing, and will provide views of the lunar surface, planets, comets and brighter deep sky objects. The Cometron 60 comes complete with all optics, mount and tripod—an outstanding value and a lasting possession.

To receive \$10 off the selling price of a Cometron 60, simply complete the coupon below and bring it to an authorized Celestron dealer. For the location of your nearest dealer, call Celestron's toll-free consumer hotline: 1-800-421-1526

Comets! Lore and Activities for Science, Language Arts, Math, Social Studies, and Art

By Catherine Valentino
(Grades 4-8)

Astronomers discover about nine to twelve new comets each year. What are they? Where do they come from? The answers to these and other intriguing questions await you in this activity-packed book. Contains a comet information booklet, a poster of a 1910 photo of Halley's comet (color-enhanced by computer), and a three-dimensional cut-out model of the path of Halley's comet.

Now, you can save \$2.00 off suggested list price on *Comets!* To order, fill out the form below and include payment by check or credit card.

SpaceShots: The Beauty of Nature Beyond Earth

By Timothy Ferris

SpaceShots is a showcase of eighty of the most stunning photographs ever made of outer space and man's involvement with it. Selected from hundreds of thousands of images, each of the photographs reproduced here has been chosen for its visual impact, and the total effect is magnificent. Accompanying the photographs is a text written in Ferris's acclaimed style, in which he investigates the question of the relationship of art and nature as it is illuminated by space photography.

SpaceShots is a remarkable collection that invites further involvement with outer space and contemplation of the philosophical issues that attach to this involvement.

Now, you can receive *SpaceShots* at a \$5.00 discount!
